

Rebate Program

Small Business Funding that Save Money

What do all businesses need? More customers, and more money! We can help.

Through a special arrangement with lenders, your business can purchase the most efficient electrical surge protection system on the market. A unique package has been developed for small business owners who are in need of cost cutting PLUS operating capital. Under our lease/purchase program, you can acquire a superior electrical surge protection system that will lower your maintenance costs, reduce replacement costs (such as light bulbs), reduce downtime, and make your electrical system more efficient. (Some customers also realize a reduction in overall electricity consumption.)

In addition, you will receive a rebate directly from Energy Concepts LLC that amounts to approximately 70% of the project costs (minimum project costs is \$10,000). No filling out forms to be submitted, no wait (rebate within 1 week of finalization), and rebate sent directly to you to be used as you want. You pick the lease option to fit your budget (48,60 months). You may also realize tax benefits from this plan (consult a CPA).

In summary, you can invest in a technology that will save you money in your business, receive a lump sum rebate to invest, and the savings you realize from the equipment can help pay the monthly payments.

DON'T JUST PAY BACK A LOAN, INVEST IN YOUR BUSINESS.
