

Definition of a finance company for purposes of this survey:

Finance companies include companies in which 50 percent or more of assets are held in any of the following types of loan or lease assets:

- a. *Liens on real estate* – outstanding balances on loans or leases, for any purpose, secured by liens on real estate
- b. Loans and leases not secured by real estate:

Business loans and leases – outstanding balances on loans and on leases for commercial and industrial purposes to sole proprietorships, partnerships, corporations, and other business enterprises

Consumer loans and leases – outstanding balances on loans and on leases for household, family, and other personal expenditures

For purposes of this survey, finance companies do not include commercial banks, cooperative banks, credit unions, investment banks, savings banks, savings and loan institutions, and industrial loan corporations. However, subsidiaries of a bank holding company, savings and loan holding company, or foreign banking organization may be considered finance companies if they satisfy the above criteria.
