EQUIPMENT LEASING ACQUISITION OPPORTUNITY:

DEVELOPER OF PRIVATE LABEL VENDOR PROGRAMS

Kropschot Financial Services represents the founder of an exceptionally profitable full service equipment leasing company who has decided to retire and would like to sell his business. The company develops private label vendor programs for prominent equipment manufacturers, and it has leased over \$1 billion of equipment in its long history. Although lease originations have declined in recent years due to market conditions and in anticipation of the founder's retirement, the company has continued to be exceptionally profitable.

This organization represents a unique opportunity for an acquirer to enter the vendor leasing business immediately with a skilled management team and proprietary systems that have been acclaimed as the best in vendor leasing. The founder expects to retain the company's lease portfolio, thereby eliminating risks for the acquirer and minimizing the investment required to acquire the on-going business. Although large companies will likely find this opportunity to be attractive, the founder is also receptive to providing some owner financing to individuals who are proven originators of leases and who would like to own a successful leasing business with a relatively modest investment.

If you have an interest in this unusually attractive acquisition opportunity, please contact Bruce Kropschot of Kropschot Financial Services at bkropschot@kropschot.com or (772) 234-4544.
